***Acknowledgement***

Receipt is acknowledged of the Amendment filed November 2, 2005.

***Reasons for Allowance***

Claims 1 and 4-6 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Ferianz, taken alone or in combination of other references, does not teach or fairly suggest a line driver comprising, among other things, a resistive feedback network comprising a seventh resistor and an eighth resistor, wherein a first terminal of the seventh resistor is coupled to the inverting input terminal, a second terminal of the seventh resistor is coupled to the second terminal of the fifth resistor, a first terminal of the eighth resistor is coupled to the non-inverting input terminal, and a second terminal of the eighth resistor is coupled to the second terminal of the sixth resistor (claim 1); and either a third resistor unit including a fifth resistor connected to the second impedance matching resistor unit and the inverting input terminal and a sixth resistor connected to the first impedance matching resistor unit and the non-inverting input terminal; or a fourth resistor unit including a seventh resistor connected to the inverting output terminal and the inverting input terminal and an eighth resistor connected to the non-inverting output terminal and the non-inverting input terminal (claims 5 and 6), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
